

Join us for a

Town Hall for Ratepayer Fairness

Tuesday, November 18th at 7 PM

First Presbyterian Church of Pittsburgh - 320 6th Avenue

We are required to spend BILLIONS of dollars fixing our sewer system and getting sewage out of our rivers. We all want clean water, but we also want the rates we pay to be INVESTED WISELY AND FAIRLY.

Smart Solutions with Maximum Benefits

It's good for families, workers and the environment if we maximize our largest-ever investment to stop water pollution and solve multiple community needs at the same time by investing in green solutions that bring maximum benefits to our neighborhoods.

Making Sure Everyone Pays Their Fair Share

Many large businesses - especially big box stores and huge parking lots - are contributing to the problem, but aren't paying much toward the solution. Ratepayers like us are shouldering the burden instead of everyone paying their fair share, and that has to change.

Protecting Our Neighbors and Our Health

Did you know that ALCOSAN has announced that sewer bills will increase by 60% in the next four years? And that is just the beginning of years of rate increases to pay to fix our sewer system. Without a Customer Assistance program, tens of thousands of low-income, senior, and disabled households will no longer be able to afford these rate hikes and will face water shutoffs. Access to clean water and sewage treatment are necessary for public health and safety, and we must protect our neighbors and our community.

Are you concerned about these issues? Join us on
Tuesday, November 18th!
